

You have questions.
A simple blood test
may have answers.

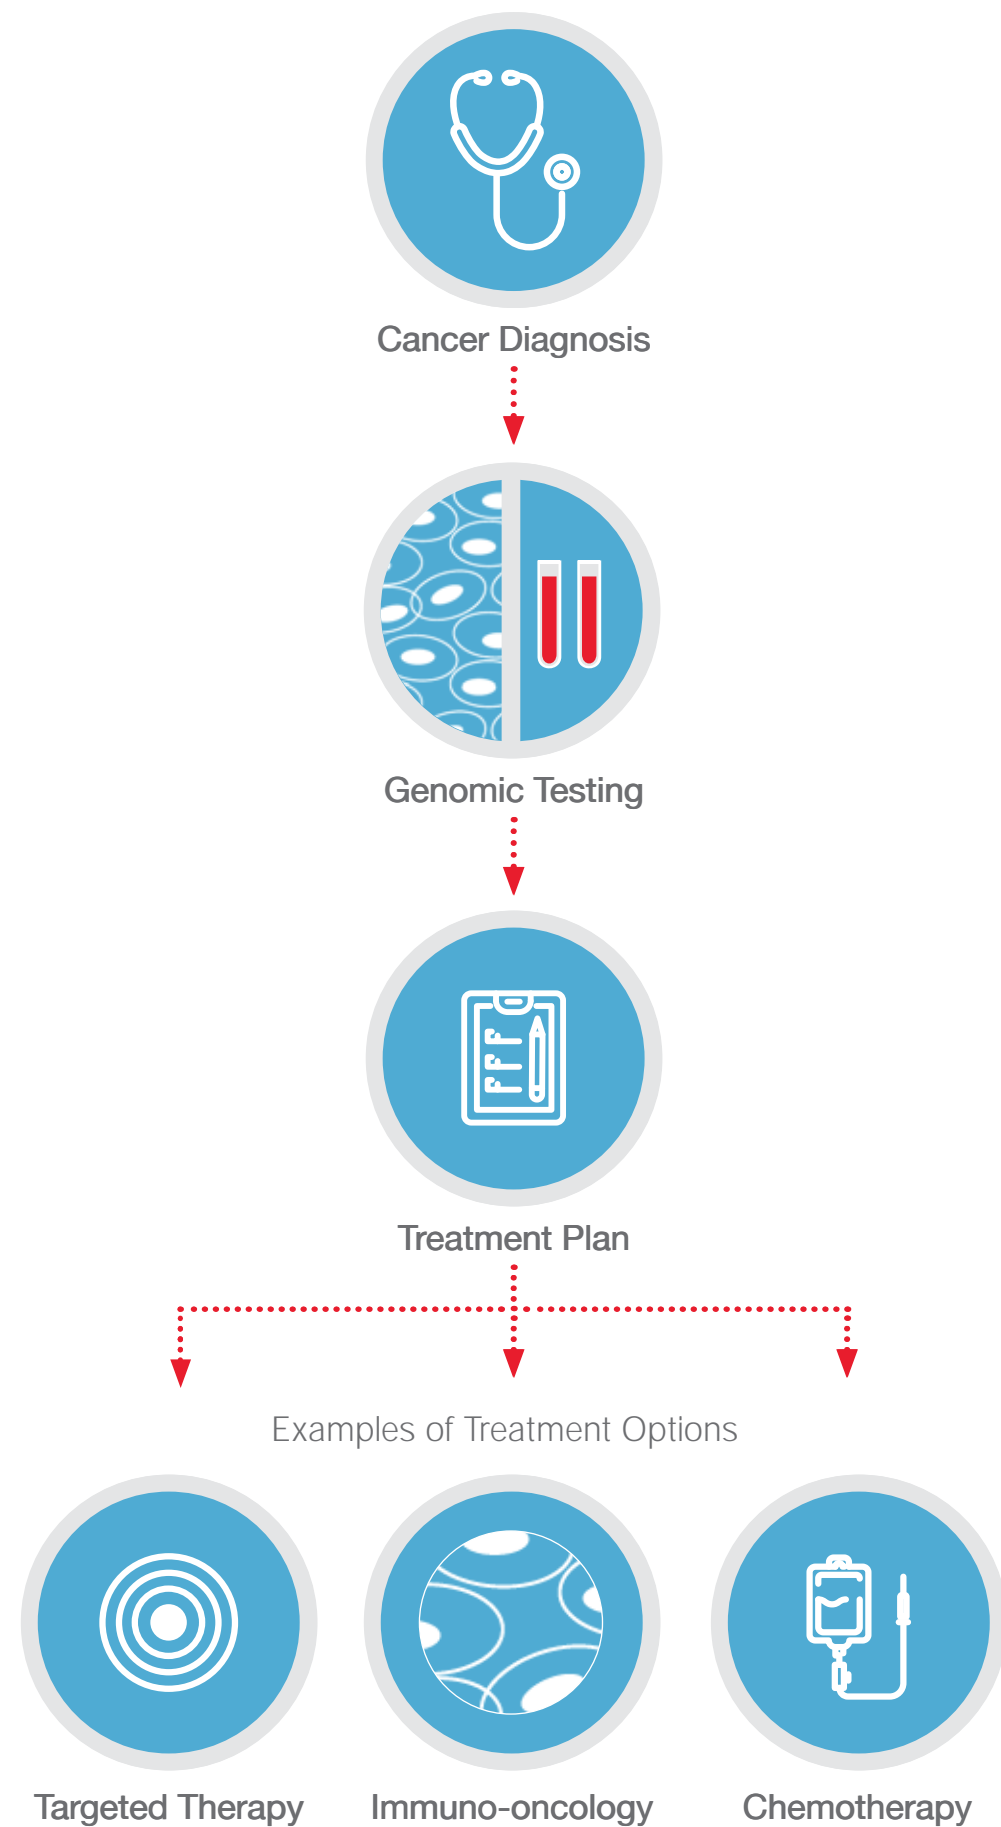

Guardant360[®] provides genomic results
to guide your treatment plan

**Your care team is here
to support you and make timely,
informed treatment decisions.**

A diagnosis can change everything in an instant. In just a week, you and your care team can have the genomic answers that may determine the course of your treatment plan.

When does genomic testing happen?

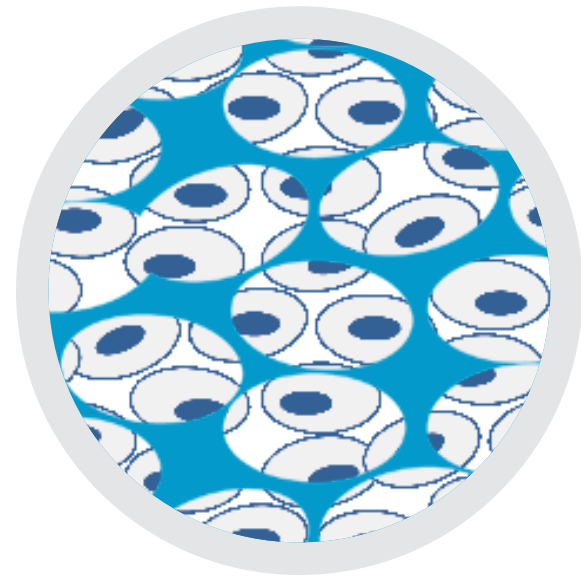

What is genomic testing?

Genomic testing is an important step after receiving a cancer diagnosis that can help your doctor personalise your treatment.

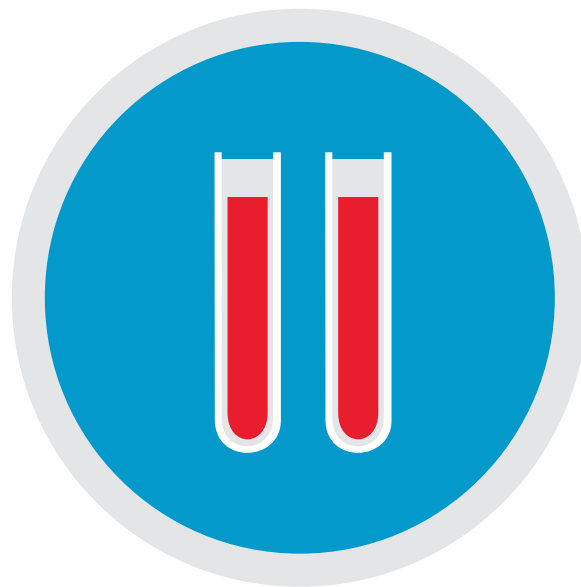

- A genomic test scans your tumour cells for certain changes called mutations
- By identifying these mutations, your doctor can determine treatments that may be best for you

Why your doctor chose a liquid biopsy test?

Tissue Test

VS

Liquid Biopsy Test

Traditional tissue testing has limitations

Limited Tissue Availability

Tissue may not provide the amount of testing material needed for complete results

Incomplete Testing

Using tissue testing alone may not find all the mutations you may have, causing you to potentially miss out on available treatment options

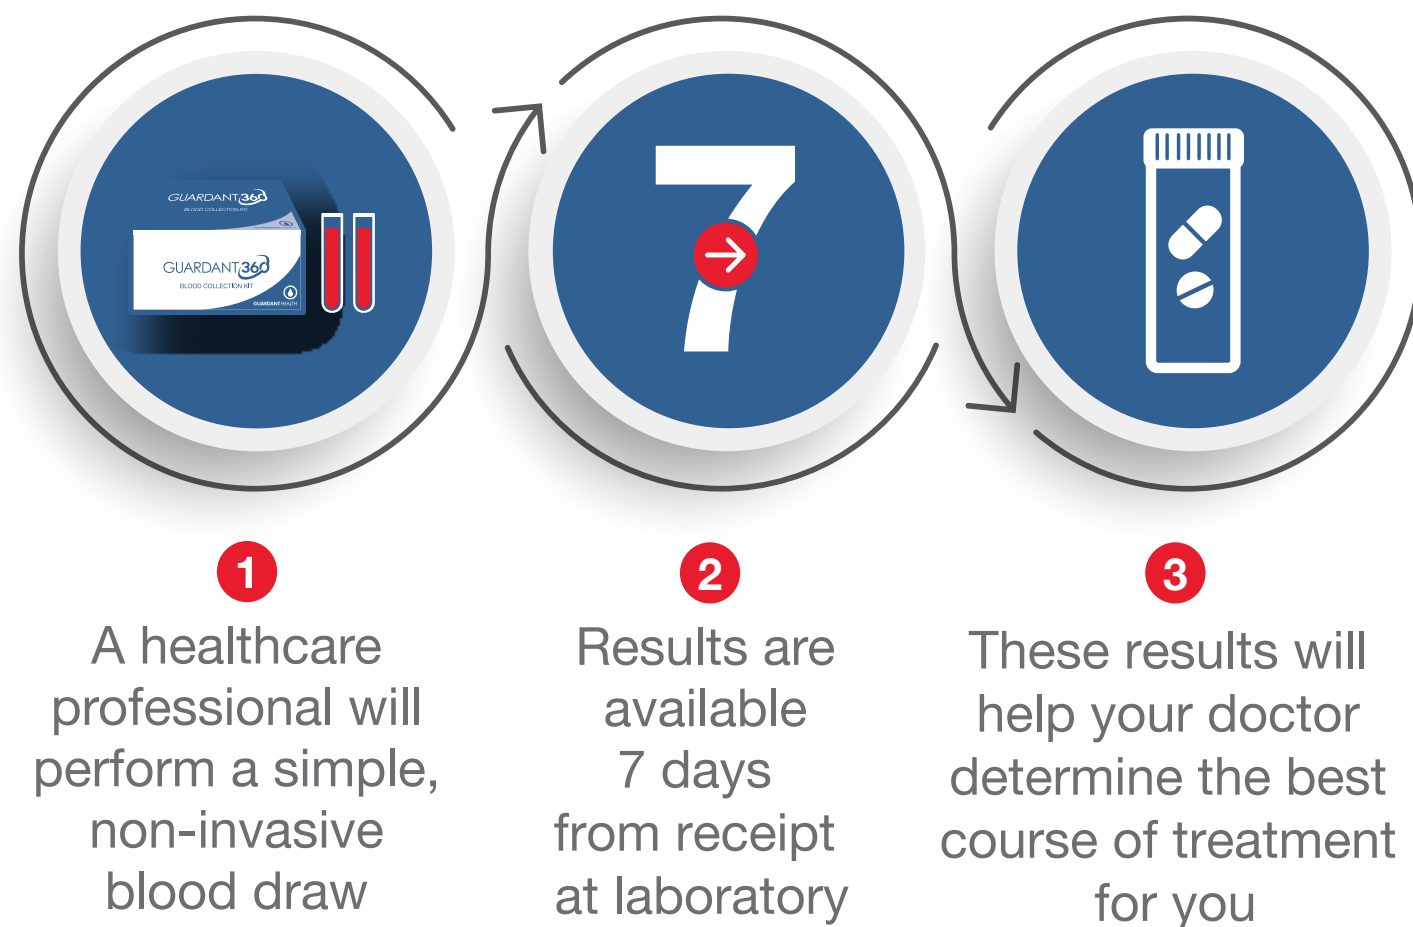

Delayed results

It can often take a month or longer to collect tissue, analyse the sample, and receive results, leading to delays in starting the ideal treatment

As an alternative to invasive tissue testing, a liquid biopsy can be completed in your doctor's office through a simple blood draw.

How can Guardant360 help?

The Guardant360 liquid biopsy test may help if:

- You or a family member has recently been diagnosed with cancer and have not started treatment
- You have already had a tissue biopsy test, but the results were incomplete or inconclusive
- You are already on treatment, but your cancer has been progressing

Guardant360 is able to find many mutations

- Tests for the mutations relevant to your cancer
- Results in 7 days from receipt at laboratory
- Allows your doctor to confidently personalise the best treatment plan for you

Guardant360 found mutations that may lead to new treatment or clinical trial options **72%** of the time¹

Results

- As soon as your results are ready, your doctor will be notified and able to access the results through a secure portal
- Your doctor will review and discuss your results and potential treatment options with you
- Our medical team is available to answer any questions your doctor may have

Payment

If you are making a payment to Guardant Health directly, a member of our Client Services team will send you an invoice by e-mail and guide you through the payment process. We accept any of the following payment methods:

- Bank Transfer
- Credit Card
- PayPal

Guardant360 is also covered by many Insurance Providers. Check with our Client Services to see if your insurer is one of them.
